

**NATURAL COMFORT**

made from pineapple leaf

# Our story

## PINALO- PINEAPPLE FROM LOMBOK

**Pinalo** started from the wish to bring Lombok new opportunity for economy growth by using natural resources. We searched for a product that could join traditional process, different communities and raw material that was already growing here. Our path was crossed by pineapple, that was used only for the fruit. So we started from scratch. Searching for pineapple farmers in the East Lombok and teaching them how to get fiber from leafs. Developing machines for scraping pina leaf with senior highschool Ondak Jaya to improve process of getting fiber out. Drying fiber and bringing it to weaving villages where 30 ladies would handwoven them into amazing fabric that we named **Pinalo**. And we didn't stop there. Beside developing fiber we started our own line of products by joining another community of sewing ladies in Lombok to empower woman even stronger.

**Pinalo** is not me, **Pinalo** is us and it represents opportunity for better life for all involved.

# Our values

NATURALLY RESOURCED  
ECO FRIENDLY  
EMPOWERING WOMAN

Challenging modern production techniques that place too much emphasis on profit at the expense of people and environment, for our values in eco-sustainability. It's not about how cheaply a product can be manufactured, but for us it is of great importance that our products are sourced responsibly, using natural and organic materials and supporting communities of woman in rural areas of Lombok.

how do we make it?

# Fabrics

For designers with sustainable vision. Choose between different sizes of thread that are used for producing the pinalo fabrics. Fabric is made from pina leaves and natural cotton from cotton tree, both grown and processed in Lombok, Indonesia
